

Dhruvil Malvania

Aspiring Data Scientist | Ahmedabad, Gujarat | +91 9510561784 | dhruvimalvania@gmail.com | [LinkedIn](#) | [GitHub](#)

SUMMARY

- Results-driven **Data Science and AI/ML** enthusiast with strong expertise in **Machine Learning, NLP, and Large Language Models (LLMs)**.
- Skilled in **Python, SQL, TensorFlow, PyTorch, Hugging Face, and MLOps tools (Docker, CI/CD, FastAPI, Streamlit)**. Hands-on experience in **developing predictive models, fine-tuning LLMs, and deploying scalable AI solutions**.
- Actively seeking opportunities as a **Data Scientist / ML Engineer** to contribute impactful, production-ready solutions.

PROFESSIONAL EXPERIENCE

Cognifyz Technologies

Data Science Intern (remote)

Jan 2025 - Feb 2025

Pune, Maharashtra

Technology: Microsoft Power Bi, Python Libraries

- Developed a **regression model** with **85% accuracy** for restaurant data analysis and forecasting.
- Conducted **exploratory data analysis (EDA)** and implemented **feature engineering** to optimize model performance.

SKILLS

- **Programming & Data:** Python (Pandas, NumPy, Scikit-learn), SQL (MySQL), R (basic) Data Preprocessing, Feature Engineering, EDA
- **Machine Learning & AI:** ML Models, Deep Learning, NLP, LLM Fine-Tuning, Transformers (BERT, RoBERTa, Hugging Face), LangChain, Prompt Engineering, Vector Databases
- **MLOps & Deployment:** Docker, Git, GitHub Actions, MLflow, FastAPI, Streamlit, CI/CD Pipelines
- **Visualization & Analytics:** Power BI, Tableau, Matplotlib, Seaborn
- **Cloud Platforms:** Google Cloud Platform (Vertex AI), AWS (Basics), Azure (Basics)
- **Soft Skills:** Problem-Solving, Analytical Thinking, Communication, Collaboration, Curiosity & Learning

EDUCATION

Bachelor of Technology in Computer Science and Engineering (CPGA: 8.6)

Jun 2023 - Jun 2027

Gandhinagar Institute Of Technology, Moti Bhoyan, Gujarat, India

PROJECTS

AI Data Analyst

- Built an AI-powered tool leveraging **Python, SQL and Power BI** to analyze datasets and provide actionable insights.
 - Utilized various data analysis techniques including data cleaning, transformation and visualization to inform data-driven decisions..
- [Github Repo](#)

Auto Email Reply Bot

- Built a GPT-powered assistant to **read, classify, and generate human-like email replies** across tones (Professional, Casual, Friendly).
 - Integrated with **Gmail API and Telegram** enabling **24/7 automated responses with human approval**.
- [GITHUB REPO](#)

Youtube Video Segmentor

- Designed an NLP-powered system to **segment YouTube videos into chapters** using **Transformers and topic modeling**.
 - Enhanced content navigation by **35%**, deployed via **Streamlit** for end-user accessibility.
